## About Us

Two young entrepreneurs had a concept in mind about the Taxi Fleet Management way back in the year 2002. This concept was realized into a hot selling product with full service support to the taxi industry in Europe under the name "Quipment Group BV". Qipment thus started

its operations in The Netherlands (Holland) from 2002 and has been delivering consistently high quality products and services to the taxi operators throughout Europe, now for more than a decade. Qipment, today, has reached the top spot in the global business of taxi management services.

Quipment Group BV expanded its operations in India from August 2010 under the name "Insigno Qipment Technologies (India) Pvt. Ltd." in Ahmedabad, Gujarat. Insigno Qipment Technologies focuses on Research & Development on Taxi Fleet Management Products and caters to other automotive product domains.

Quipment Group BV has more than 45 Qipmates in The Netherlands along with round-the-clock service staff to ensure reliable, consistent and high quality customer support for all their products and services. Insigno Qipment Technologies currently has a team

of 70 Qipmates and this number would expand to 100 Qipmates by mid of year 2013.

# Company

## Global Presence

Insigno Qipment Technologies (India) Pvt. Ltd. is an extension of Qipment Group BV, The Netherlands for software research & development activities. Qipment Head Quarters is in Nijmegen (The Netherlands) with a corporate office in Amsterdam. The sales offices are located in The Netherlands, Germany, Italy and Belgium.

## Infrastructure Facilities

Insigno Qipment Technologies has an excellent IT infrastructure in place. The development centre is fully equipped with all necessary research and development tools for embedded and mobile domains. To make sure that The Netherlands and India centre are fully connected, we have highly equipped conference rooms and CISCO video conferencing facilities.

The offices are securely controlled by IP cameras and biometric authentication systems with round-the-clock surveillance. Being a Microsoft Gold partner, Qipment equipments are equipped with Microsoft licensed products. The interconnectivity between different offices of Qipment is achieved with 5 MBPS lease line with backup facilities and dedicated VPN tunnel between Ahmedabad and Nijmegen (The Netherlands) office. Qipment's secured datacentres are operated from Amsterdam, Den-Bosch and Nijmegen.

The office in Ahmedabad is having separate working spaces for technical & research department and support & administration functions.

# Products

## ■ Quipment BCT® Focus®: Ready for the future

With the launch of the Quipment BCT® Focus®, which stands for Onboard Computer Taxi, we set a new standard for All-In-One solutions in the taxi industry worldwide.

The latest techniques are used to not only the fastest but also the most reliable partner of each taxi can be. Thus, the 7 inch screen is unique and the only on-board computer in direct sunlight readable. The easy to use software is a delight for every driver to work, including the extremely useful 3D navigation.

Communication between the cab and the central on-board computer is via the GPRS network and software updates over the air and can be done via WiFi.

## ■ Independence

All the functionalities of the terminals are fully supported by the well-known software packages. In addition, the BCT coupled with our VP50 printer.

# Products

## ■ Quipment IN COMMAND!® - A complete integration

With the “Quipment in Command” solution, taxi companies get a fully integrated on-board computer with taximeter at their disposal. Individual devices on and around the dashboard are unnecessary.

The solution includes in addition to the standard data communication module, based on GPRS, all that the taxi company can wish of credit card and debit card transactions to an external alarm. “Quipment in Command® is very easy to use and suitable for updates over the air (GPRS and WiFi). This creates a unique service model that makes the ‘Quipment in Command® a real all-rounder.

## ■ Independence

All the functionalities of the terminal are fully supported by the well-known software packages. In addition, the InCommand VP50 can be coupled with the printer.

# Products

## QIM - you deliver more tangible results!

The development of QIM is caused by the needs of the market. A market that propels through cost, efficiency and safety are hereby important every day. These are also the principles for the results working with QIM yield.

By deploying the QIM data terminal fleet owners have a total solution in hands. Addition to data communication, the following matters entirely to the wishes of the customer, be integrated.

- a navigation module
- a mobile voice module
- a taximeter

## Unique service

All the functionalities of the terminals are fully supported by the well-known software packages. In addition, the BCT coupled with our VP50 printer.

# Products

## Boordcomputer.nl, Track & Trace software

The Track & Trace software Quipment allows such vehicles to follow on a graphics card via the website [www.boordcomputer.nl](http://www.boordcomputer.nl). To the vehicles are labels attached to which certain statuses of the vehicle are connected through Web.

In the same application, locations and vehicles can be looked up on the map. Also there may be a map displayed at a particular address. It is also possible with this solution to the travelled route of a given vehicle to display on a map. This review is of course always in a schematic overview (both PDF and Excel). In addition to the applications with the map material can be made with data reviews and reports as:

- Start and stop times
- Driving and rest
- Kilometers
- Maximum and average speed

# Products

## Access via the Internet

Web access through a unique code gives users access to a special website ([www.boordcomputer.nl](http://www.boordcomputer.nl)) where all information can be stored and accessed. The only thing you need is a computer with an internet connection.

Investments continue in this way at least and in addition, you are guaranteed the latest map material, all updates and service of the software.

Q-Planning is equipped with the tools necessary to arrive at an optimal arrangement of all group transport routes, including the deployment of personnel and equipment. The power of the system lies in the fact that large amounts of information are easily accessible and the effects of mutations are passed on immediately. A planner can now decide on the basis of the most comprehensive and current information.

### Always optimal routes

Creating an efficient, smooth running schedule was always a very complex and labor intensive. Q Planning will now automatically advise on the most efficient route order and, after acceptance the table retrieval time for you to determine.

# Products

To create routes of high quality modern techniques implemented that works based on the most recent maps. Achieving an optimum in the pursuit of punctuality and customer satisfaction can only be on the basis of powerful software, which is capable of many variations in a short time to calculate. This is also one of the basic elements in Q-Planning.

### Dynamic daily schedule

Q-Planning will generate a daily schedule so that the actual driven routes can be registered. If the routes are laid down, once a complex process based on geographical parameters, individual needs and constraints, grid operation, etc, can your internal organization in terms of vehicles and staff to address that concern. Daily practice is however rarely as previously planned, but very dynamic! Q-Planning provides for the flexibility to mutations and incidents, on the basis of the overall overview of the planned and in progress being group transport. In addition, Q-Planning for adequate commitment to daily practice and the impact of decisions taken, resulting in transparency to the principals and further improving the group transport process on the basis of daily practice.

### Flawlessly by Action

The action list in Q-Planning includes all activities as the planner of the group transport has to be performed. Q-scheduling in an intelligent and efficient way operational plans based on structural and all applicable daily mutations. At each change in the dagplanningen, whether participants, personnel or vehicles, automatically scans the system for possible conflicts elsewhere in the schedule and automatically generates the resulting action items. Such action may include a daily schedule needs to be adjusted elsewhere, or simply to inform a driver on a sick message. In a route, all action items to be dealt with before this route can be made

# Products

operational. This means that changes take effect, if all conditions have been met. By using Q-plan, the chance of errors by the planning and the Central so at least!

## Q Planning Online

The online version of Q-Planning offers the option of the transport process to clients. By your customer(s) access to Q-Planning Online gives you the ability to name and address details and riding (such as times and locations). In addition one can directly pass mutations such as sick-and better reports, absence and changes of pick-up addresses. Any changes will only be made after approval by the planner.

# Products

## Qube Afstortzuil - depositing has never been easier!

The 'Qube' is an ingenious waste dump column which store and administer cash safer and easier than ever. Concerned about cash sales are a thing of the past.

## Extremely easy to use

The practical design enables Qube afstortzuil everywhere and without architectural adjustments. Then drivers only need to follow the instructions on the touch screen to deposit their cash within seconds. The coin and paper money is automatically separated.

# Products

## Statements and other useful functions

Via a special menu, which is only accessible with a passcode, it totals on the computer screen and prints or forward it.

## Safety first

The column is constructed from high quality components and equipped with its own power supply. The money is collected in a secure part and there is even a full alarm installed to prevent unauthorized access counter.

# Products

## Taxi Column

With the Taxi Column of Quipment, it is easy to book a ride for everyone. The Column allows people to simply book a taxi and track the status of their reservation. Taxi Column is an ideal solution for many region taxi projects.

## Booking and information tracking

The Taxi Column is a booking and information system in one. The traveller performs a (region taxi) pass in the Taxi Column, after which through a simple touch screen menu and a ride home or to any other desired address can be booked. The upper display shows constantly relevant information about the posted rides, such as the estimated time of arrival of the taxis.

## For everyone

The menu is specially developed for use by the elderly. The Taxi Column is easily operable by people with visual disabilities. A voice guides the user through the menu. If it unfortunately does not work, then the handset will be picked up to ride again via the call centre to book.

# Technologies
